**DETAILED ACTION**

1. Claims 1-20 are pending in this communication filed 02/13/01.
2. The IDS filed 06/04/01 has been considered and entered.

***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, drawn to an article being auctioned off and bidding associated with the article and examinations of one or more advertisements, classified in class 705, subclass 26.
  - II. Claims 10-20, drawn to a method for garnering the attention of persons viewing the information of the particulars of an auction, classified in class 705, subclass 37.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I has an article being auctioned off and bidding associated with the article and examinations of one or more advertisements. The subcombination has separate utility such as a method for garnering the attention of persons viewing the information of the particulars of an auction.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
